Challenges to Success

The case of South Africa

- Education is **not equal** – rich and poor
- Poor learners in townships **travel far** to good schools in the suburbs
- Teachers **demotivated** – low salaries
- School infrastructure – underdeveloped
- School resources minimal, e.g labs and libraries

Result

- Goal of education is not achieved
- High levels of drop outs
- No prevention measures for drop outs
- Drop outs lead to idleness and gangsterism and drug abuse
- Many young people unemployed, unemployable
